Why is this week's topic important for teamwork?

This week we learned about leadership in the Lord's way, we learned that the leadership in the Lord's way is based on love, example, A leader gives the people the opportunity to follow him, he can train and lift others, a leader is not characterizing by his position or calling, he is characterizing by his ability to listen, direct and uplift other and bring an overall productivity from each team members. A leader leads by example, leads with vision and leads with Love.

How do plan on contributing to the team, besides completing your tasks?

I plan to try and be a great example and practice leadership skills without being the lead of the group. I plan to be prepared and help other team members.

How does your experience relate to other experiences you have had?

I have practiced leadership skills before on mission as I served as a trainer, district and zone leader. I tried to develop all the Christlike attribute that the Lord have shown us.

How does your experience relate to other classmates' experiences?

We all learned about being a leader with a small L, this does not mean that we are powerless. But rather means that we need to be able to be great example and have that quality to bring the best out of others without breaking their agency and at the same time be teachable and know that we can learn from everyone.

If this was a religion class, how would you relate this week's topic to the gospel?

I will relate it to being a true disciple of Jesus Christ. Jesus Christ himself is the perfect leader, he has shown us all that we must do to be saved and has given us all the keys and

tips to be great leaders. He helped us understand that leaders need to be humble, welcoming, confident, selfless, appreciative, grateful and be an example.
